ZOOM
TECHNOLOGY
A ZOOM Group holdings Company

COMPANY PROFILE

ABOUT US

ZOOM Technology, a proud part of **ZOOM** Group Holdings, operates with a clear and focused mission – to transform technology into a powerful asset for your business success.

With over 35 years of industry experience, we empower our clients by delivering innovative construction solutions, advanced technologies, and efficient project management systems – all designed to accelerate growth while maintaining cost-effectiveness.

Our domain-expert teams are available 24/7, providing comprehensive support that goes beyond technology. We specialize in serving modern construction and project management requirements, ensuring quality, precision, and performance at every stage.

At **ZOOM** Technology, we believe in building long-term relationships through attention to detail, reliability, and an unwavering commitment to customer satisfaction.

Our Mission

At **ZOOM** Technology, our mission is to deliver innovative construction chemical solutions, advanced application tools, and expert technical services that enhance structural performance, durability, and efficiency across the nation. We are committed to quality, precision, and customer satisfaction in every project we undertake.

Our Vision

To become a Pakistan recognized leader in construction technology by setting new benchmarks in product innovation, service excellence, and integrated solution delivery – building stronger structures and stronger partnerships for the future.

CORE VALUES

ZOOM Technology, we operate with a set of core values that guide every project and partnership.

1- First Thing - The Client Commitment

Putting our customers at the center of every solution and decision.

2- Every Actions Transparency

Operating transparently, ethically, and responsibly.

3- Continuous Improvement \ Innovational Growth

Always refining processes to enhance performance and quality.

4- 24/7 Customer Support

Leveraging modern technology to drive progress and efficiency.

5- Miner things are always very important

Reliable after-sales service and responsive technical assistance.

6- Zoom Team! The Best Team

Collaborating with skilled professionals to deliver excellence.

LEADERSHIP TEAM

CEO

As CEO, I am proud to lead a company that manufactures quality construction chemicals, supplies branded construction tools and machinery, and related professional services. Our goal is simple – to provide reliable, durable, and safe solutions that help our customers build better and faster. We focus on quality, innovation, and customer satisfaction in everything we do. With a dedicated team and strong partnerships, we continue to grow and improve day by day. We thank our customers, partners, and employees for their continued trust and support. Together, we are committed to building stronger structures and a stronger future for our communities.

MD and Executive Team

We are really committed to turning vision into action through strong execution and teamwork. Every department plays an important role in ensuring smooth operations, timely delivery, and consistent performance across our product range. We focus on continuous improvement, responsible manufacturing, and building lasting relationships with our clients and suppliers. We appreciate the hard work of our employees and the confidence of our customers. Together, we strive to move forward !

OUR TEAM

We are proud to be part of this organization and to contribute our skills and dedication every day. As a team, we believe in cooperation, respect, and supporting one another to achieve shared goals. We work with passion and responsibility, always aiming to give our best in every task we handle. The positive work environment motivates us to learn, grow, and improve continuously. We value the trust placed in us and remain committed to performing our duties with honesty and teamwork. Together, we stand united in contributing to the company's steady progress and future growth.

ZOOM GROUP

About ZOOM Group Holdings

ZOOM Group is a Pakistan-based enterprise established in 1991, with over 35 years of excellence in commercial & residential building, construction and infrastructure development. Our expertise spans Project Management & Construction Services, Construction Chemicals, Heavy Machinery, Power and Diamond Tools, Remote Demolition, Handheld Power Cutters, Piping Technologies, Anchoring Systems, and Hand Tools.

Group Companies and Roles

ZOOM ENGINEERS

Building construction, multi-storey projects, and specialised structures executed through controlled, well-planned, and disciplined site operations.

ZOOM TECHNOLOGY

Construction technology, tools, fixing systems, chemicals, and specialist support services for efficient and reliable project execution.

ZOOM KINGKRETE

Construction chemicals and performance material systems designed to meet the demands of modern construction needs.

ZOOM READY MIX CONCRETE

Ready-mix concrete supply support for projects requiring consistent batching and reliable delivery.

What Makes the Group Strong

- Multi-discipline capability under one holding structure
- Experienced technical teams and field support
- Ability to support time-sensitive and high-standard projects

HEALTH, SAFETY, ENVIRONMENT & QC

Introduction:

Health, Safety, and Environmental (HSE) Management is a core part of our business operations and equal in importance to all other management systems. This guide outlines essential safety guidelines that all employees must follow as a condition of employment. It provides minimum safety requirements and general principles, while additional site-specific rules may apply. Employees should consult their supervisor for any clarification or additional safety requirements.

Our Policy

We are committed to protecting our people, public, assets, and environment by ensuring safe and responsible operations at all times. We strictly comply with all applicable laws and industry HSE standards while continuously improving our safety practices. Through shared accountability and strong management systems, we reduce risk and deliver sustainable value.

Quality

We deliver high-quality services by continuously improving our processes and meeting international standards to exceed customer expectations.

A Structure for Safety

We believe it is possible to deliver the energy the world needs while protecting people and the environment. Safety and operational integrity are the foundation of our business – nothing is more important. Our commitment to excellence in safety, security, and health guides every decision we make and is embedded in our policies, management systems, and conditions of employment.

Safety in Operations

We operate safely and comply with all applicable laws and regulations. Safety, security, and health are integrated into our daily operations and performance monitoring.

HEALTH, SAFETY, ENVIRONMENT & QC

Environmental Performance

We are committed to reducing environmental impact and operating responsibly to protect natural resources.

Workplace

We provide a safe and healthy workplace, ensuring all employees return home safely and communities remain protected.

Health

We promote employee well-being through effective health management and awareness programs that encourage healthy lifestyles.

PEC-II

PAKISTAN ENGINEERING COUNCIL
Licence No: **95274** Category: **C6** Validity: **30 June, 2026**
LICENCE OF PAKISTANI CONSTRUCTOR/OPERATOR
(Under the bye-laws of Pakistan Engineering Council 1987)

This is to certify that M/s **ZOOM TECHNOLOGY** (Licencee), with its registered office at **OFFICE NO. 1 FIRST FLOOR MALIK COMPLEX 80-WEST, JINNAH AVENUE BLUE AREA ISLAMABAD** have been licenced under Construction and Operation of Engineering Works Bye-laws 1987, until the validity date to construct/operate engineering works, the construction/capital cost of which does not exceed **Rs. 25 (TWENTY FIVE) Million** provided the licencee fulfils all the qualification requirements prescribed by Client or Employer for a particular engineering work; and subject to the licencee continuing to fulfill all the requirements of the bye-laws.

Field of Specialization **BC01 - BC02 - BC04 - CE01 - CE04(v) (Irrigation Only) - CE04(vii) (Flood Control Systems Only) - CE08 - CE09 - CE10 - CE11(viii) (Infrastructure Development Works) - (TEN ONLY)** (Specialization Code Nos. for detail see overleaf)

Date of Issue: **04-Jan-2026**
(Islamabad)

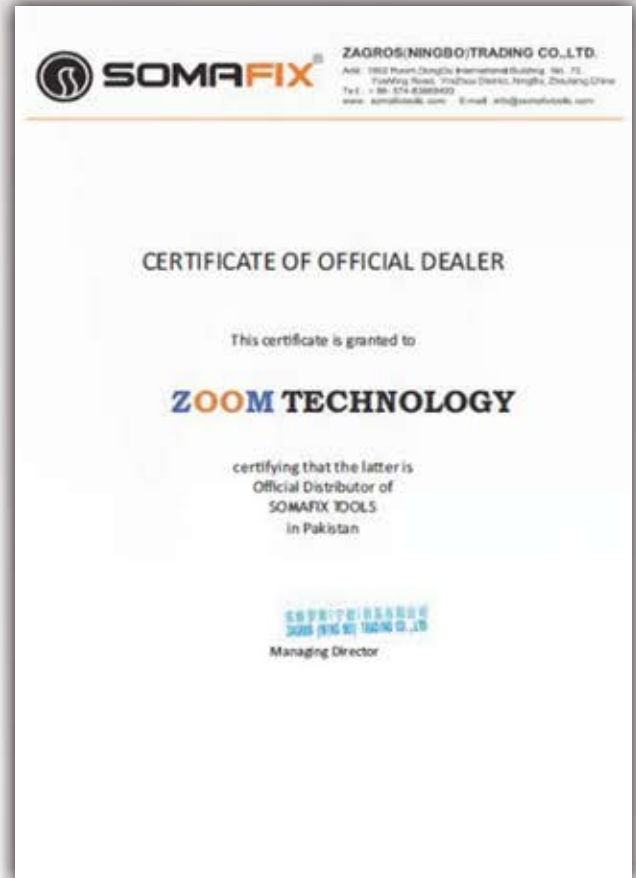

Registrar
Pakistan Engineering Council,
Islamabad.

Note:

1. If a firm does not get renewal of its licence within a year after expiry of its licence, the firm may be renewed after payment of outstanding fee if entire defaulting period plus surcharge at the rate of 5% of defaulting fee amount, or as prescribed from time to time.
2. The employer must ensure employment of engineers whose names are mentioned on backside of the licence. The Consulting Engineer (the Engineer Incharge in case the consultant is not appointed) shall monitor the number of engineers employed by the Constructor/Operator and inform the Council accordingly.
3. Owner(s) of the firm shall be held responsible, if any information, document or paper submitted by him/them is found incorrect or forged.

OUR CERTIFICATIONS

OUR PRODUCTS

POWER TOOLS

Drill machines, grinders, battery screw drivers, jack hammers, welding plants, and complete hand tool range for construction and industrial use.

PIPING TOOLS

Tube cutters, pipe bending tools, threading machines, HVAC tools and accessories, inspection tools, and drain cleaning machines for maintenance and installation work.

FIXING SYSTEMS

Self-drilling screws, dry wall screws, mechanical and chemical anchors, nylon anchors, sealants, foam, and general fasteners for structural and finishing works.

CUTTING TOOLS

Dry and wet cutting blades, core cutting machines, tile cutters, road cutters, and wire saw machines for accurate cutting and controlled openings.

OUR PRODUCTS

HEAVY MACHINERY

Plate compactors, power trowels, grinding machines, vibrator rollers, water pumps, steel bar cutters and benders, and concrete mixers for site execution support.

TARPS

Netting, monofilament knitted shade cloth, PVC Panama fabric, PVC tarpaulin, cotton canvas, and awnings for site protection, shading, and coverage solutions.

CONSTRUCTION CHEMICAL

KINGKRETE inc. a global leader in a manufacturing of construction chemical has partnered with ZOOM Group to bring latest construction products & trends in Pakistan under the umbrella of ZOOM KINGKRETE Pakistan.

GEO MEMBRANE

HDPE and PVC geomembrane, geo textile, dimple membrane, PVC water stopper, and protective polythene solutions for waterproofing, containment, and civil works.

OUR SERVICES

CONCRETE TESTING

On-site and project support testing services to assess concrete strength, quality, and performance for decision making and compliance needs.

CUTTING

Precise core cutting and openings for mechanical, electrical, and plumbing routes with controlled execution and clean finishing.

DEMOLISHING

Controlled demolition support for renovation and modification works where safety, dust control, and site discipline matter.

RE-BAR & ANCHOR GROUTING

Rebar grouting and anchoring support using mechanical and chemical systems for structural fixing, extensions, and strengthening works.

OUR SERVICES

WATERPROOFING

Waterproofing solutions and application support for roofs, basements, tanks, wet areas, and civil structures to prevent leakage and long-term damage.

JOINT SEALING

Joint sealing services for expansion and movement joints in civil, industrial, and commercial surfaces to avoid cracking and water intrusion.

FLOORING SERVICES

Flooring solutions for industrial and commercial facilities including surface preparation and durable system application as per site requirement.

CONCRETE REPAIR & STRENGTHENING

Repair and strengthening support for damaged concrete, cracks, honeycombing, and structural rehabilitation using proven systems and methods.

CONSTRUCTION WORKS

Comprehensive construction support for residential, commercial, and multi-storey projects, including specialised structures, delivered through controlled site execution, quality management, and disciplined construction practices.

POWER TOOLS

OVERVIEW AIR TOOLS, WELDING, ACCESSORIES

Power Tools Range

Our power tools category is selected for demanding site conditions where load, dust, continuous runtime, and safety are critical. We support contractors, workshops, HVAC teams, fabrication units, & maintenance departments with professional-grade tools and matching accessories.

Cordless Drill / Impact Drill / Rotary Hammer / Drill Press

Angle Grinder / Jig Saw / Sander / Cut off Saw / Bench Grinder

Air Tools / High Pressure Cleaner / Electric Blower

Welding Machine / Battery Charger / Water Pump / Generator

Screw Driver / Voltage Tester / Spirit Level / Vernier Caliper

Drill Bit / Jig Saw Blade / Hole Saw (Set)

Cup Brush / Disc / Abrasive Paper / Saw Blade

Spanner Set / Socket Set / Lug Wrench / Lever

Value for Clients

- Faster site productivity
- Improved finishing accuracy
- Reduced downtime through correct tool selection
- Safer operation with suitable accessories and handling support

Air Tools and Site Utilities

Welding and Power Support

Hand Tools and Measuring Tools

Consumables and Tooling Accessories

PIPING TOOLS

COMPLETE WORKFLOW

INSTALLATION & MAINTENANCE SUPPORT

Piping Tools Category

Our piping tools range supports plumbing, HVAC installation, maintenance, inspection, and industrial piping works. The focus is controlled installation, better joint quality, and reduced leakage risk.

Core Workflow Coverage

-  Cutting tools for tubes and pipes
-  Diamond-core drilling for routing and openings
-  Bending tools for controlled shaping
-  Bonding and joining support systems
-  Testing and leak detection tools
-  Freezing solutions for maintenance and isolation
-  Inspection and locating tools
-  Flushing and pipe cleaning machines
-  Plastic pipe welding solutions

Installation Tools

Maintenance and Inspection

Operational Benefits

Where It Fits

- Commercial buildings and hospitals
- Industrial facilities and plants
- HVAC ducting and chilled water networks
- Plumbing and drainage systems

FIXING SYSTEMS

OVERVIEW APPLICATION LINES

Fixing Systems Category

Fixing systems are critical for safety, long-term holding strength, and correct load transfer. We supply fixing solutions designed for common site substrates and real job-site conditions.

Main Product Families

-  Self-drilling screws and drywall screws
-  Mechanical anchors and chemical anchors
-  Nylon anchors and hollow-fixing solutions
-  Sealants, adhesives, and expansion foams
-  General fasteners and installation accessories

Specialized Fixing Lines

Base plates and steel structures

What Clients Gain

- Higher pull-out reliability
- Cleaner installation and better finish
- Reduced rework and fewer failures
- Correct fixing selection for each substrate

CUTTING TOOLS

DRY, WET, EXPANSION JOINT CUTTING DIAMOND DRILLING, GRINDING, CONCRETE CUTTING

Dry Cutting

-  Blade range for universal purposes
-  Options for hard materials and abrasive materials
-  Special blades for specific applications

Drilling with Diamond

Grinding in Dry Conditions

Concrete Cutter

Drilling and Hammer Bits

Wet Cutting

-  Bench saw machines and wet cutting blades
-  Cleaner cut quality for certain materials
-  Specific blades for controlled performance

Expansion Joints Cutting

-  Floor saw machines
-  Expansion joint blades designed for joint cutting & control

On-Site Advantages

- Cleaner edges and accurate lines
- Faster job completion with reduced breakage
- Controlled cutting for routing and finishing needs

HEAVY MACHINERY

OVERVIEW SITE USE & SUPPORT

Heavy Machinery Range

Designed to support civil works, road works, compaction, concrete handling, and reinforcement processing for demanding site environments.

Common Equipment

- | | |
|--|---|
|  Plate compactors |  Screed levelers |
|  Power trowels |  Water pumps |
|  Concrete cutters |  Steel bar benders & cutters |
|  Jumper hammers |  Concrete mixers |
|  Grinding machines |  Generators |
|  Vibrator rollers | |

Where It Fits

- Earthwork and sub-base preparation
- Concrete placing and finishing activities
- Road and pavement works
- On-site reinforcement processing

TARPS

OVERVIEW APPLICATIONS & SELECTION

Tarps Category

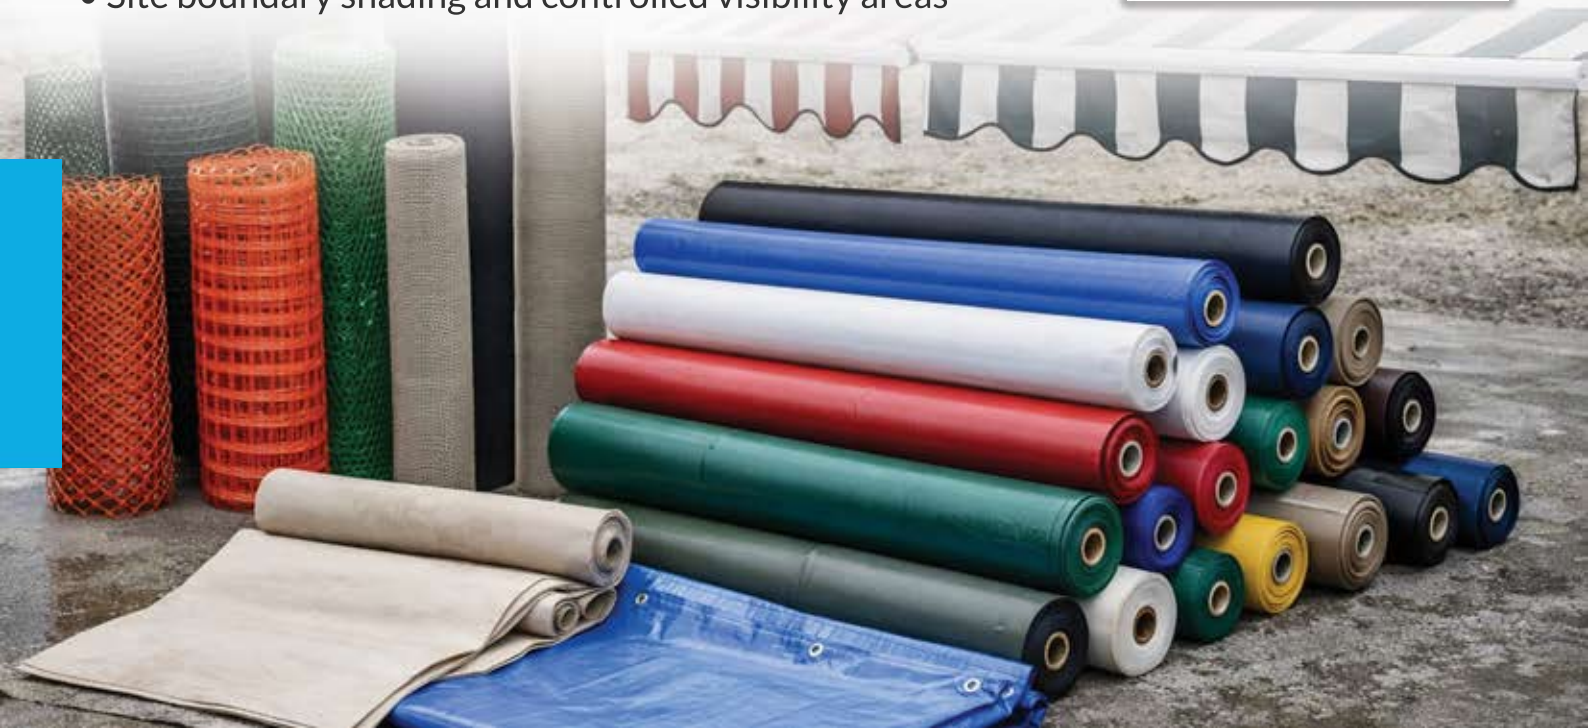

We supply tarps and fabric solutions for site protection, shading, storage covering, and industrial usage where weather, dust, and sunlight control is required.

Product Range

-  Netting
-  Monofilament knitted shade cloth
-  PVC coated Panama fabric
-  PVC coated fabric options
-  PVC tarpaulin
-  Cotton canvas
-  Awnings

Typical Uses

- Shading and heat control for work zones
- Protection for materials and equipment storage
- Temporary coverings for open areas and scaffolding
- Site boundary shading and controlled visibility areas

CONSTRUCTION CHEMICAL

Construction Chemical Solutions

We provide high-performance construction chemical solutions designed to enhance durability, strength, waterproofing, and long-term structural performance for residential, commercial, and industrial projects.

Key Benefits

-  Improve structural durability
-  Enhance bonding and surface strength
-  Protect against water leakage and corrosion
-  Increase project lifespan and performance

What We Deliver

- Site inspection and surface evaluation
- Product selection based on project needs
- Technical application guidance
- Supervised installation support
- Quality checks and performance assurance

RANGE OF CONSTRUCTION CHEMICALS

Concrete Producing Systems

Surface Treatment Systems

Concrete Repairs & Strengthening Systems

Grouts & Anchors Systems

Joint Sealing Systems

Protection Systems

Flooring Systems

Water Proofing Systems

Tiling & Stone Systems

Adhesives & Mortar Systems

Underground Construction Technology Systems

GEO MEMBRANE

OVERVIEW TYPES WE SUPPLY

Geo Membrane Solutions

Geo membranes are impermeable sheets used to control fluid migration and protect structures in civil and environmental applications. These systems are used to separate, line, seal, and protect where seepage or leakage risk must be controlled.

Common Applications

-  Water containment and storage
-  Waste containment and environmental protection
-  Civil engineering and infrastructure works
-  Roofing and waterproofing protection layers

HDPE Geo Membrane

PVC Geo Membrane

Geo Textile

Dimple Membrane

PVC Water Stopper

Pro Polythene

CONCRETE TESTING SERVICES

Schimdt Hammer Testing

We provide an on-site service to facilitate the sampling and making of concrete test cores as well as a collection service. All cores done through Diamond core cutting in complete solution with testing services.

Concrete Scanning

We provide an on-site service to facilitate the sampling and making of concrete test cores as well as a collection service. All cores done through Diamond core cutting in complete solution with testing services.

Ultrasonic Pulse Velocity Test

We provide an on-site service to facilitate the sampling and making of concrete test cores as well as a collection service. All cores done through Diamond core cutting in complete solution with testing services.

Core Extraction & Test

We provide an on-site service to facilitate the sampling and making of concrete test cores as well as a collection service. All cores done through Diamond core cutting in complete solution with testing services.

CONCRETE TESTING SERVICES

EXECUTION & REPORTING

Pull Out Test

- Verification of anchor bolt and rebar fixing strength
- On-site load testing to confirm holding capacity
- Assessment of bonding performance in concrete
- Compliance testing as per structural safety standards

How We Execute On-Site

- Site coordination and testing plan as per area and requirement.
- Marking of test points to maintain traceability.
- Controlled test execution with minimal disruption to work zones.
- Recording of observations and readings for documentation support.

When Core Extraction Is Recommended

- Dispute on strength or quality acceptance
- Suspected weak concrete zones or honeycombing
- Structural changes, extensions, or retrofit decisions
- Verification for compliance and technical approvals

Quality Focus

- Controlled drilling/coring to avoid unnecessary damage
- Discipline in marking, handling, & sample coordination
- Safety-first execution around live environments and operational facilities

CORE CUTTING

OVERVIEW CORE CUTTING SERVICES

Core Cutting Services

We provide controlled concrete cutting and openings for routing, mechanical works, and structural requirements with focus on accuracy and safety.

Scope Coverage

-  Openings for HVAC and plumbing routes
-  Electrical pathways and conduits
-  Clean edges and controlled drilling

Where Core Cutting Is Used

-  HVAC sleeves and duct routes
-  Plumbing and drainage penetrations
-  Electrical conduit pathways and cable routes
-  Door/window openings, service shafts, and access points
-  Expansion joints and slab trenching

Key Advantages for Projects

- Accurate openings with clean edges
- Less damage to surrounding structure
- Faster routing work for MEP coordination
- Cleaner finishing and reduced corrective work

Floor Sawing

Wall Sawing

Wire Sawing

Core Drilling

DEMOLISHING

OVERVIEW METHODS & SITE CONTROL

Demolishing Services

Our demolishing support is designed for renovation & modification works where safety, precision, and controlled removal matter.

Concrete Demolition

-  Handheld demolition for restricted or difficult areas
-  Selective demolition for retrofit and modification work
-  Controlled breaking with reduced unnecessary damage

Rock Blasting / Controlled Breaking

-  Safety-focused planning and controlled execution
-  Minimal dust and disruption approach based on site limitations

Where It Fits

- Renovations and redesign changes
- Removal of damaged sections before repair
- Controlled demolition for new routing and access creation

Execution Controls

Demolishing Support

REBAR & ANCHOR GROUTING

OVERVIEW PROCEDURE & SYSTEMS

Rebar & Anchor Grouting Services

We support anchoring and doweling works for structural extensions, base plates, brackets, retrofits, and strengthening requirements. Execution follows proper drilling, cleaning, and fixing procedures for reliable holding performance.

Scope Coverage

-  Rebar doweling and extensions for RCC continuity
-  Mechanical and chemical anchoring for heavy load fixing
-  Base plate anchoring, brackets, and structural supports
-  Fixing for equipment foundations where required

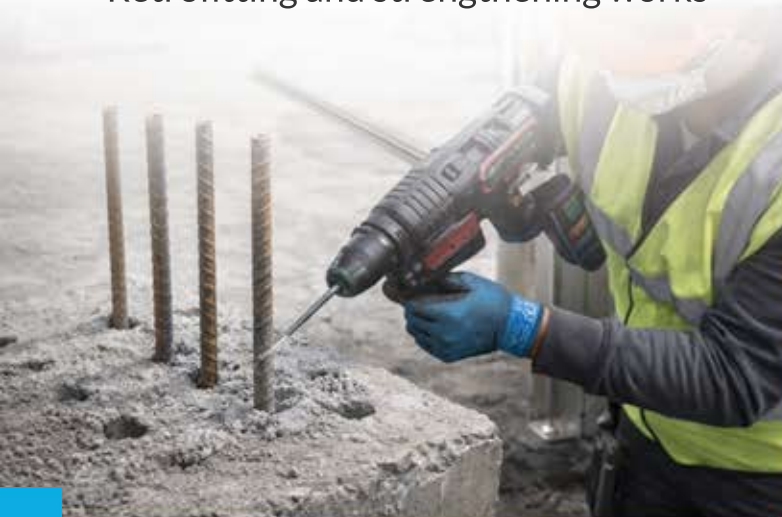

Method Discipline

Material & Systems

Where It's Commonly Used

- Structural extensions and modifications
- Steel base plates and brackets
- Heavy equipment fixing requirements
- Retrofitting and strengthening works

WATERPROOFING SERVICES OVERVIEW

Waterproofing Services

We deliver waterproofing system selection and application support for structures where leakage can damage concrete, finishes, and equipment. Our work covers both new projects and refurbishment requirements.

Core Application Areas

- Underground concrete foundations. Wall
- Walls below cladding systems
- Concrete slabs
- Basement walls
- As Protective coating

System Categories

Cementitious Waterproofing

- Underground concrete foundations, Wall
- Concrete slabs
- Basement walls
- Water retaining structures and reservoirs
- Bathrooms and wet areas
- Non-toxic suitable for drinking water

Polyurethane Waterproofing

- Dry concrete fibrous cement mosaic cement roof tiles
Wood corroded metal and galvanized steel Exposed
roofs balconies and decks
- Wet areas kitchens and bathrooms
- Shed roofs, Irrigation channels
- Basement and Retaining Walls Bridge platforms
Internal and external applications

Acrylic Waterproofing

- Suitable for application on concrete
- Masonry plaster etc Sloped roofs and vertical walls
- Over existing terrazzo tiles
- Over corrugated iron sheets
- Over roof polyurethane foam

WATERPROOFING SERVICES

ADDITIONAL SYSTEMS & CONTROL

Bituminous Damp & Waterproofing

- Underground concrete foundations
- Walls below cladding systems
- Concrete slabs
- Basement walls as protective coating

Hot-Applied & Sheet Membrane Systems

- Roofs, bridges and planters
- Metal roof decks and parking garages
- Foundations and basement walls
- Plaza decks

Execution Controls We Maintain

- Substrate inspection and surface preparation
- Layering discipline based on system type
- Detailing at joints, corners, penetrations, and terminations
- Protection and curing discipline to reduce early failure risk

JOINT SEALING OVERVIEW

Joint Sealing Services

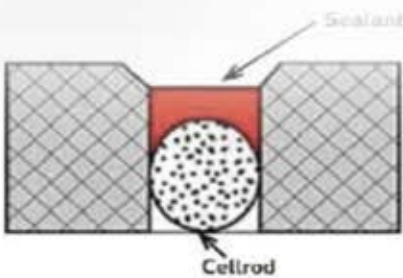

Designed to allow for movement in joints while protecting structures from chemicals and weathering elements such as water, wind, and sunlight, while preserving the overall finish.

Joint Sealing System

-  General purpose acrylic sealant
-  Neutral cure silicone sealants

Civil & Pavement Sealants

-  One component non-sag highly elastic polyurethane sealant
-  Two components non-sag highly elastic polyurethane sealant
-  One component self-levelling highly elastic polyurethane sealant
-  High performance polysulphide civil sealant
-  Pitch-free high performance cold applied sealant
-  Elastomeric high performance pavement joint sealant
-  Two component solids sealant for industrial loads and traffic
-  Fuel and oil resistant joint sealant options

JOINT SEALING SERVICES

AIRPORTS & ACCESSORIES

Airports / Runways & Aprons

- Fuel and oil resistant
- Excellent chemical resistance (mild alkalis, diluted acids, solvents)
- Pourable and self-levelling
- Suitable for climate exposure, weathering, and UV resistance
- Strong movement accommodation in butt and lap joints

Joint Fillers, Covers & Accessories

- Closed cell polyethylene backing rod (non-absorbent, rot proof)
- Compressible bitumen impregnated wood fiber sheets
- High density compressible closed cell polyethylene joint filler

Execution Controls

- Correct joint preparation and cleaning
- Correct backing and depth control
- Proper finishing to protect joint edges and long-term performance

FLOORING SERVICES

Epoxy

The epoxy range is hard-wearing, dimensionally stable and decorative. It provides surfaces that are hygienic, easily cleanable and resistant to chemical spillage, with excellent adhesion and slip resistant options.

Polyurethane

The polyurethane range is hard-wearing, non-tainting, UV stable, flexible, decorative, and has excellent adhesion. It offers resistance to chemical spillage, different options for slip resistance and steam-cleaning ability for certain products.

MMA

The MMA range provides very fast installation and curing, It is UV stable and decorative, with slip resistant options available and suitable for application at very low temperatures.

Cementitious based flooring

The cementitious based flooring product range is suitable for new-build and refurbishment projects. It is economical and compatible with a wide range of floor substrates, it also offers self-leveling options that are fast drying, available in a range of colours and can be used as a final floor finish subject to traffic.

Dry shakes hardeners & stamped concrete

Dry shakes hardeners and stamped concrete product ranges can be used as monolithic flooring, and demonstrate improved abrasion resistance, low maintenance and impact resistance. These products also reduce surface dust, and are available in a range of colours.

Curing compounds, liquid hardeners & sealers

These products can improve concrete's curing process resulting in better surface properties. They can also reduce dusting and where sealers are concerned, reduce surface absorption.

FLOORING SERVICES

CEMENTITIOUS & ENHANCERS

Cementitious Based Flooring

- Suitable for new-build and refurbishment
- Economical and compatible with many substrates
- Self-levelling options that are fast drying
- Available in multiple colours and finish options

Dry Shakes Hardeners & Stamped Concrete

- Monolithic flooring with improved abrasion resistance
- Reduced surface dust and low maintenance options
- Available in a range of colours

Curing Compounds, Liquid Hardeners & Sealers

- Improve curing and surface properties
- Reduce dusting and surface absorption
- Support longer surface life and improved finishing

CONCRETE REPAIR & STRENGTHENING OVERVIEW

Zoom services is a concrete repairs specialist, offering a range of expert concrete refurbishment and repair services, including concrete repair and protection, cathodi protection, carbon fibre strengthening and concrete crack sealing solutions. We have over 10 years' experience in the concrete industry, repairing water and wastewater industry assets and concrete structures including: industrial units, commercial & residential buildings, historical monuments, bridges, reservoirs, water storage tanks, water towers, water and waste water treatment plants, storm tanks and silos. We use a varied range of specialist repair mortars in our role as a dedicated concrete repairs contractor. These include a range of sprayed concrete repair systems that are tailored to each specific concrete repair through investigation by our experienced staff. Over the years we have been able to develop the specialist knowledge to identify, plan and implement the correct approach for each individual concrete repair requirement for our clients.

● Cementitious Repair

Repair using cement-based materials to restore damaged concrete surfaces and improve durability.

● Carbon Fibre Reinforced

High-strength carbon fiber system used to increase structural load capacity and strengthen weak areas.

● Epoxy Repair

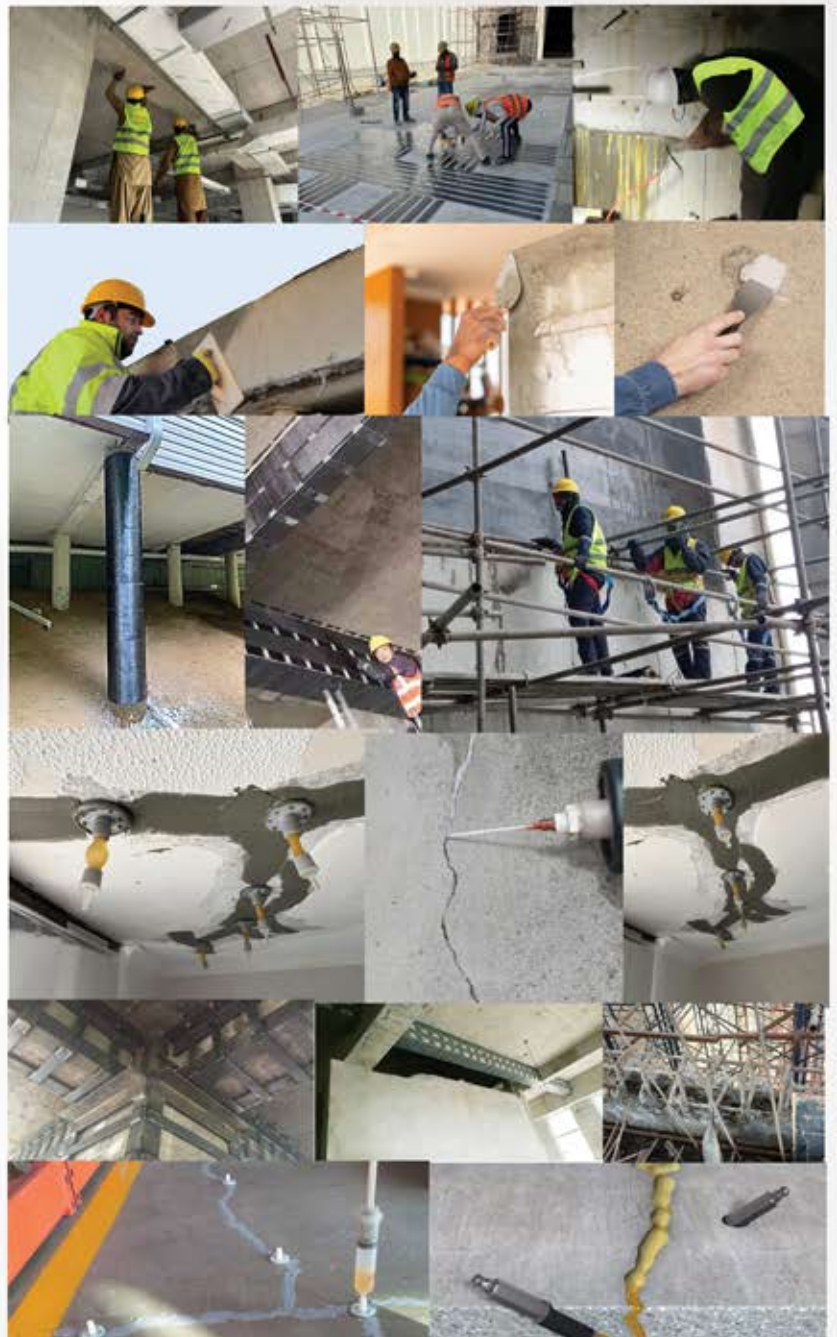

Resin-based solution for crack filling, bonding, and restoring structural integrity of concrete.

● Strengthening

Methods used to enhance the load-bearing capacity and overall performance of existing structures.

● Injection

Technique of injecting resin or grout into cracks to seal, bond, and restore structural stability.

CONSTRUCTION WORK SCOPE

Construction Support

We supports construction works by supplying execution-grade products and providing specialist site services that help teams maintain accuracy, safety, and continuity during high-load, high-traffic projects.

Where We Support Construction Projects

-  Residential housing projects and villas
-  Commercial buildings and office complexes
-  High-rise towers and mixed-use developments
-  Industrial construction and factory buildings
-  Infrastructure projects and public facilities

Support Deliverables on Site

- Structural repair and strengthening solutions
- Concrete casting, finishing, and surface treatment
- Installation support for steel, anchors, and fixtures
- Waterproofing and joint sealing applications
- Site coordination to ensure timely project execution

CONSTRUCTION SERVICES

✂ 1- Project Studies / Pre- Design Analysis

- Preliminary Studies.
- Feasibility Studies.
- Surveys.
- Estimates.

✂ 2- Renovation Work

- Renovation Face Uplifting.
- Structural Additions or Deletions.
- Underpinning & Shorting.
- Demolition.

✂ 3- Construction Services

- Infrastructure Development.
- Residential Buildings.
- Commercial Buildings.
- Housing Colonies & Complexes.
- Educational Recreational, Health, Office & Religious Buildings.
- Roads Pavements Highways.
- Infrastructure.
- Steel Frames/Structure and Space Frames.
- Bridges, Culverts, Clouverreas.
- Pipe Lines.

✂ 4- Specialized Services

- Prestressing of Concrete.
- Furnishing – Wood & Metal.
- Interior Design.
- Landscaping.
- General Environmental Planning.
- Surveys for Town Planning Works,
Like Socio Economics, Land use Health, Education Etc.

STRUCTURAL CONSTRUCTION & SITE EXECUTION

METHODS

Execution Discipline

- Detailed site planning and technical preparation
- Compliance with approved drawings and specifications
- Skilled manpower deployment and equipment control
- Material quality verification before installation

Outcome Focus

- Strong and durable structural performance
- Timely project completion within target schedule
- Optimized material usage and cost efficiency
- Improved structural stability and load performance
- Long-term reliability with minimal maintenance
- Strict adherence to safety standards and protocols
